

dogmask

KOO EUROPE srl

**Face mask for dogs,
cats and other
small animals devised
for Anesthesia, Ventilation
and Aerosol therapy.
Made of high
transparency PVC
cone and black
silicone diaphragm**

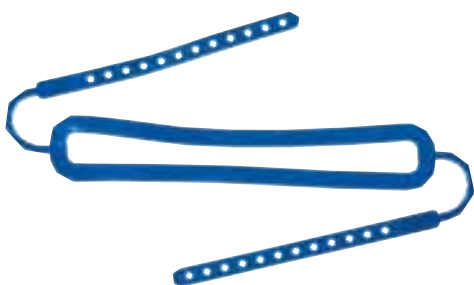

- Reusable face mask for dogs, cats and other small animals for Anesthesia, Ventilation and Aerosol therapy, with silicone diaphragm.
- The significant flexibility of the diaphragm permits a minimal air leakage during ventilation.
- The specially designed shape of the cone assures low air resistance.
- Minimal skin damage is guaranteed by the soft flexible interface.
- Latex free material.
- Available in six sizes: Dog small - Dog medium - Dog large - Cat small - Cat medium - Cat large.
- The six different models allow a perfect fitting of any kind of small animal, from large dogs to small cats and other animals as well (rodents, rabbits, reptiles...).
- Thanks to the **Harness** (optional), made of a resistant elastic material, the mask may easily be fixed to the animals face.
