KOO EUROPE srl

**Nasal mask
for non-invasive
ventilation (CPAP and Bilevel)
with silicone cushion.
Great fit, lightweight,
low dead space coefficient,
and extreme
patient comfort**

- Reusable nasal mask for non-invasive ventilation with silicone cushion.
- The flexible silicone cushion guarantees air-tightness, with minimal air leakage during ventilation.
- Minimal skin-breakdown results from the soft interface of the cushion.
- The light weight of the nasal mask assures good patient comfort.
- The adjustable forehead spacer permits a correct mask fitting on any patient's face.
- It's features include low dead space coefficient and low air resistance.
- Two connector ports for O₂, EtCO₂, and for airway pressure measuring.
- Available in three sizes: small - medium - large.
- All Latex free materials.
- The **Headgear** (optional) is made of lightweight elastic material, which lets the skin breath.

OPTIONAL

TECHNICAL CHARACTERISTICS

Code	Size	Weight gr.	Dead space	Connector diameter
KM503	Small	41,0		External 22 mm Internal 15 mm
KM502	Medium	46,0		External 22 mm Internal 15 mm
KM501	Large	47,5		External 22 mm Internal 15 mm
